

Best Place to See Obtuse Art That Looks Cool But No One Can Understand

Conceptual art is just that: it starts from a concept, an idea, something inherently intangible. So of course first encounters with it, be it visual or performance-based, usually end like this: “My child could make that!” or “Why is she dancing around?” Bodega in Old City has a real monopoly on the best, but still accessible art in the city, often seeking to break down the barrier between the “concept” and the physical product. Go down and take a look—and if you don’t get it, at least a pyramid covered in slime looks pretty awesome.
